I. SUBJECTS

THE METALLURGICAL SOCIETY OF AIME

HONORS AND AWARDS

The Metallurgical Society honors five as Fellows. Feb. 1972, p. 55.
1972 TMS annual meeting lecturers. Feb. 1972, p. 56.
1972 TMS awards. Feb. 1972, p. 57.
1972 AIME award winners. Feb. 1972, p. 59.
1971 Ironmaking Committee. Feb. 1972, p. 30.
1972 AIME awards. March 1972, p. 57.
1972 AIME honorary membership. March 1972, p. 58.
1971 NOH & BOSC Committee. March 1972, p. 29.
Nominating form for TMS Fellows. March 1972, p 67.
1971-72 IMD Technical Committees. April 1972, p. 69.
Ironmaking Conference awards. April 1972, p. 73.
Open Hearth Conference awards. April 1972, p. 74.
1972 IMD lecturer. April 1972, p. 65.
1971-72 IMD officers and administrative committees. May 1972, p. 47.
Electric Furnace award. Nov. 1972, p. 42.
Mechanical Working Conference awards. Dec. 1972, p. 22.

MEETINGS AND PROGRAMS

TMS-AIME annual meeting advance program. Jan. 1972, p. 48.
31st Ironmaking Conference official program. Feb. 1972, p. 23.
55th NOH & BOSC official program. March 1972, p. 25.
MMIJ-AIME meeting in Japan. March 1972, p. 60.
1972 TMS-AIME Spring Meeting program. April 1972, p. 49.
Second International Conference on Titanium announcement. April 1972, p. 75.
Second International Conference on Superalloys program. June 1972, p. 49, July 1972, p. 54.
1972 TMS Fall Meeting announcement. Aug. 1972, p. 43.
AIME & MMIJ Joint Meeting plans. Sept. 1972, p. 56.
1972 Electric Furnace Conference preliminary program. Oct. 1972, p. 50.
Electric Furnace program. Nov. 1972, p. 37.
Mechanical Working program. Dec. 1972, p. 19.

OFFICERS

1971-72 TMS divisional officers. Feb. 1972, p. 18.
David Swan, 1972 TMS president. Feb. 1972, p. 14.
AIME board of directors. April 1972, p. 17, Aug. 1972, p. 1.
Dennis L. McElroy, 1972 AIME president. April 1972, p. 73.
Nominations for 1973 AIME offices. July 1972, p. 45.
1973 officers of AIME. July 1972, p. 48.
1973 officers of TMS of AIME. July 1972, p. 49.
Wayne E. Glenn nominated for AIME president. July 1972, p. 45.
James C. Fulton nominated TMS president-elect. July 1972, p. 45.
TMS divisional officers nominated. July 1972, p. 45.
AIME vice presidents. July 1972, p. 46.
AIME directors nominated. July 1972, p. 47.
AIME Council of Economics nominations. July 1972, p. 47.
Electric Furnace Committee. Nov. 1972, p. 47.
Mech. Working Committee. Dec. 1972, p. 23.

TECHNICAL ARTICLES

ALLOYS

New electroslag remelting facility at Carpenter Technology in Reading, Pa. Jan. 1972, p. 20.

Vacuum induction melting technology of high-temperature alloys. R. Schlatter. May 1972, p. 17.

ALLOY STEELS

Microduplex processing of low alloy steels. E. Snape and N. L. Church. Jan. 1972, p. 23.

Thermomechanical processing of nickel-base alloys. B. H. Kear, J. M. Oblak and W. A. Owczarski. June 1972, p. 25.

ALUMINUM

Aluminum as a reductant. D. Belitskus. Jan. 1972, p. 30.

Aluminum Matrix composites. I. J. Toth, W. D. Brentnall and G. D. Menke. **I Introduction and primary fabrication methods.** Sept. 1972, p. 19. **II Secondary fabrication.** Oct. 1972, p. 37. **III Mechanical properties.** Nov. 1972, p. 72. **IV Environment, application, cost, and future.** Dec. 1972, p. 37.

Potential for production of metallic and ceramic materials by freeze-drying. S. H. Gelles and F. K. Roehrig. June 1972, p. 23.

Trigas fluxing. R. J. Adamo and C. L. Brooks. Aug. 1972, p. 21.

BASIC OXYGEN FURNACE

A new lease for the Bessemer. R. Deily. March 1972, p. 31.

Design aspects of Stelco's BOF facility. G. F. Newton. Oct. 1972, p. 15.

Effect of operating variables on BOF lining. R. K. Lyengar and F. C. Petrilli. March 1972, p. 46.

Oxy-fuel oil practice and performance for BOF steelmaking. J. W. Onuscheck and R. L. W. Holmes. Sept. 1972, p. 26.

Steelmakers to tour South Works steelmaking facilities. March 1972, p. 21.

The start-up and design of the BOP shop at United States Steel, Lorain Works. T. V. Ciukaj. March 1972, p. 43.

BLAST FURNACE

Computer program for study of blast furnace burdens and practices. T. M. Barnes and H. W. Lownie, Jr. Feb. 1972, p. 46.

Computer techniques for blast furnace burdening control. June 1972, p. 33.

Ironmakers to see America's biggest blast furnace. Feb. 1972, p. 19.

Some new results of flooding in packed beds and their significance to blast furnace hanging. N. Standish and J. B. Drinkwater. Feb. 1972, p. 43.

Titanium sub-oxides and the blast furnace slag's fluidity. G. Handfield, G. G. Charette, and H. Y. Lee. Sept. 1972, p. 37.

BURNS HARBOR

Ironmakers to see America's biggest blast furnace. Feb. 1972, p. 19.

CERAMICS

Potential for production of metallic and ceramic materials by freeze-drying. S. H. Gelles and F. K. Roehrig. June 1972, p. 23.

COAL

Coal and energy efficiency. F. Milliken. Aug. 1972, p. 15.

COKE

Cokemaking in the Seventies. Feb. 1972, p. 32.

1972 AIME honorary membership. March 1972, p. 58.
1971 NOH & BOSC Committee. March 1972, p. 29.
Nominating form for TMS Fellows. March 1972, p 67.
1971-72 IMD Technical Committees. April 1972, p. 69.
Ironmaking Conference awards. April 1972, p. 73.
Open Hearth Conference awards. April 1972, p. 74.
1972 IMD lecturer. April 1972, p. 65.
1971-72 IMD officers and administrative committees. May 1972, p. 47.
Electric Furnace award. Nov. 1972, p. 42.
Mechanical Working Conference awards. Dec. 1972, p. 22.

MEETINGS AND PROGRAMS

TMS-AIME annual meeting advance program. Jan. 1972, p. 48.
31st Ironmaking Conference official program. Feb. 1972, p. 23.
55th NOH & BOSC official program. March 1972, p. 25.
MMIJ-AIME meeting in Japan. March 1972, p. 60.
1972 TMS-AIME Spring Meeting program. April 1972, p. 49.
Second International Conference on Titanium announcement. April 1972, p. 75.
Second International Conference on Superalloys program. June 1972, p. 49, July 1972, p. 54.
1972 TMS Fall Meeting announcement. Aug. 1972, p. 43.
AIME & MMIJ Joint Meeting plans. Sept. 1972, p. 56.
1972 Electric Furnace Conference preliminary program. Oct. 1972, p. 50.
Electric Furnace program. Nov. 1972, p. 37.
Mechanical Working program. Dec. 1972, p. 19.

OFFICERS

1971-72 TMS divisional officers. Feb. 1972, p. 18.
David Swan, 1972 TMS president. Feb. 1972, p. 14.
AIME board of directors. April 1972, p. 17, Aug. 1972, p. 1.
Dennis L. McElroy, 1972 AIME president. April 1972, p. 73.
Nominations for 1973 AIME offices. July 1972, p. 45.
1973 officers of AIME. July 1972, p. 48.
1973 officers of TMS of AIME. July 1972, p. 49.
Wayne E. Glenn nominated for AIME president. July 1972, p. 45.
James C. Fulton nominated TMS president-elect. July 1972, p. 45.
TMS divisional officers nominated. July 1972, p. 45.
AIME vice presidents. July 1972, p. 46.
AIME directors nominated. July 1972, p. 47.
AIME Council of Economics nominations. July 1972, p. 47.
Electric Furnace Committee. Nov. 1972, p. 47.
Mech. Working Committee. Dec. 1972, p. 23.

TECHNICAL ARTICLES

ALLOYS

New electroslag remelting facility at Carpenter Technology in Reading, Pa. Jan. 1972, p. 20.

Vacuum induction melting technology of high-temperature alloys. R. Schlatter. May 1972, p. 17.

ALLOY STEELS

Microduplex processing of low alloy steels. E. Snape and N. L. Church. Jan. 1972, p. 23.

Thermomechanical processing of nickel-base alloys. B. H. Kear, J. M. Oblak and W. A. Owczarski. June 1972, p. 25.

ALUMINUM

Aluminum as a reductant. D. Belitskus. Jan. 1972, p. 30.

Aluminum Matrix composites. I. J. Toth, W. D. Brentnall and G. D. Menke. **I Introduction and primary fabrication methods.** Sept. 1972, p. 19. **II Secondary fabrication.** Oct. 1972, p. 37. **III Mechanical properties.** Nov. 1972, p. 72. **IV Environment, application, cost, and future.** Dec. 1972, p. 37.

Potential for production of metallic and ceramic materials by freeze-drying. S. H. Gelles and F. K. Roehrig. June 1972, p. 23.

Trigas fluxing. R. J. Adamo and C. L. Brooks. Aug. 1972, p. 21.

BASIC OXYGEN FURNACE

A new lease for the Bessemer. R. Deily. March 1972, p. 31.

Design aspects of Stelco's BOF facility. G. F. Newton. Oct. 1972, p. 15.

Effect of operating variables on BOF lining. R. K. Lyengar and F. C. Petrilli. March 1972, p. 46.

Oxy-fuel oil practice and performance for BOF steelmaking. J. W. Onuscheck and R. L. W. Holmes. Sept. 1972, p. 26.

Steelmakers to tour South Works steelmaking facilities. March 1972, p. 21.

The start-up and design of the BOP shop at United States Steel, Lorain Works. T. V. Ciukaj. March 1972, p. 43.

BLAST FURNACE

Computer program for study of blast furnace burdens and practices. T. M. Barnes and H. W. Lownie, Jr. Feb. 1972, p. 46.

Computer techniques for blast furnace burdening control. June 1972, p. 33.

Ironmakers to see America's biggest blast furnace. Feb. 1972, p. 19.

Some new results of flooding in packed beds and their significance to blast furnace hanging. N. Standish and J. B. Drinkwater. Feb. 1972, p. 43.

Titanium sub-oxides and the blast furnace slag's fluidity. G. Handfield, G. G. Charette, and H. Y. Lee. Sept. 1972, p. 37.

BURNS HARBOR

Ironmakers to see America's biggest blast furnace. Feb. 1972, p. 19.

CERAMICS

Potential for production of metallic and ceramic materials by freeze-drying. S. H. Gelles and F. K. Roehrig. June 1972, p. 23.

COAL

Coal and energy efficiency. F. Milliken. Aug. 1972, p. 15.

COKE

Cokemaking in the Seventies. Feb. 1972, p. 32.

Effects of major processing variables on properties of metallurgical grade petroleum cokes. C. B. Scott and H. O. Folkins. July 1972, p. 25.

COMPOSITES

Advanced composites design: B & W takes a big step. April 1972, p. 23.

Aluminum matrix composites. I. J. Toth, W. D. Brentnall, and G. D. Menke. **I Introduction and primary fabrication methods.** Sept. 1972, p. 19. **II Secondary fabrication.** Oct. 1972, p. 37. **III Mechanical properties.** Nov. 1972, p. 72. **IV Environment, application, cost, and future.** Dec. 1972, p. 37.

COMPUTER

Computer program for study of blast furnace burdens and practices. T. M. Barnes and H. W. Lownie, Jr. Feb. 1972, p. 46.

Computer techniques for blast furnace burdening control. June 1972, p. 33.

CONTINUOUS CASTING

Inland's new melt shop on display. Nov. 1972, p. 32.

Slab casting is here to stay. Aug. 1972, p. 18.

Temperature control for a six-strand billet caster. D. A. Domchek. March 1972, p. 38.

COPPER

Metal users and the commodities markets. G. L. Zenz. Oct. 1972, p. 34.

On the true value of metals. R. E. Cech. Oct. 1972, p. 30.

Recovery of copper from slags by flotation. K. N. Subramanian and N. J. Themelis. April 1972, p. 33.

Review of roof refractories in the reverberatory copper smelting furnace. A. L. Renkey and T. F. Soroka. June 1972, p. 18.

Sulfur recovery from metallurgical fluegas. G. M. Meisel. May 1972, p. 31.

COPPER SMELTING

A copper recovery process based on novel S^{-2} to S^{+6} reduction chemistry. C. M. McFarland and R. E. Cech. Oct. 1972, p. 20.

Air pollution abatement plans at the Inspiration smelter. D. W. Rodolff and E. R. Marble, Jr. July 1972, p. 14.

Review of roof refractories in the reverberatory copper smelting furnace. A. L. Renkey and T. F. Soroka. June 1972, p. 18.

The Noranda process for continuous smelting and converting of copper concentrates. N. J. Themelis, G. C. McKerrow, P. Tarassoff, and G. D. Hallett. April 1972, p. 25.

ECONOMICS

A look at the near future of titanium. E. R. Rowley. Oct. 1972, p. 12.

Low-cost sheet, an R & D problem. F. M. Palmer. Dec. 1972, p. 29.

Metal users and the commodities markets. G. L. Zenz. Oct. 1972, p. 34.

On the true value of metals. R. E. Cech. Oct. 1972, p. 30.

Optimum economics via arc furnace power demand control. D. R. Jones and W. F. Monteith. Nov. 1972, p. 60.

Technical economics for metallurgists. R. J. Kuhl. **I Factors and methods in feasibility.** May 1972, p. 40. **II Selecting processes and equipment.** June 1972. p. 40. **III Construction and production in estimating.** July 1972, p. 39. **IV Financial analysis of a project.** Aug. 1972, p. 28. **V A case study: maxi or mini.** Sept. 1972, p. 41.

EDUCATION

1972 senior class—metallurgy and materials science. J. P. Nielsen. April 1972, p. 45.

Educational trends in metallurgy and MSE. M. Cohen. Jan. 1972, p. 42.

Engineers and the environment. H. H. Kellogg. June 1972, p. 13.

Paced instruction in metallurgical engineering. F. E. Rizzo and J. H. Ford. July 1972, p. 35.

The engineer in today's world. C. F. Jones. Jan. 1972, p. 13.

Tomorrow's metallurgy. J. J. Gilman. Feb. 1972, p. 51.

Women and the engineering profession. M. A. H. Franson. Dec. 1972, p. 32.

ELECTRIC FURNACE

Griffin Wheel. Nov. 1972, p. 50.

Inland's new melt shop on display. Nov. 1972, p. 50.

New electroslag remelting facility at Carpenter Technology in Reading, Pa. Jan. 1972, p. 20.

Optimum economics via arc furnace power demand control. D. R. Jones and W. F. Monteith. Nov. 1972, p. 60.

Steelmakers to tour South Works steelmaking facilities. March 1972, p. 21.

The mechanics of consumption of graphite electrodes in electric steel furnaces. W. E. Schwabe. Nov. 1972, p. 65.

Vacuum induction melting technology of high-temperature alloys. R. Schlatter. May 1972, p. 17.

ELECTRODES

The mechanics of consumption of graphite electrodes in electric steel furnaces. W. E. Schwabe. Nov. 1972, p. 65.

ELECTROSLAG

New electroslag remelting facility at Carpenter Technology in Reading, Pa. Jan. 1972, p. 20.

ENERGY CRISIS

Coal and energy efficiency. F. Milliken. Aug. 1972, p. 15.

Impact of the energy crisis on metallurgical practice. W. L. Crentz. May 1972, p. 14.

ENGINEERING

1972 senior class—metallurgy and materials science. J. P. Nielsen. April 1972, p. 45.

Educational trends in metallurgy and MSE. M. Cohen. Jan. 1972, p. 42.

Engineers and the environment. H. H. Kellogg. June 1972, p. 13.

Paced instruction in metallurgical engineering. F. E. Rizzo and J. H. Ford. July 1972, p. 35.

Technical economics for metallurgists. R. J. Kuhl. **I Factors and methods in feasibility.** May 1972, p. 40. **II Selecting processes and equipment.** June 1972, p. 40. **III Construction and production in estimating.** July 1972, p. 39. **IV Financial analysis of a project.** Aug. 1972, p. 28. **V A case study: maxi or mini.** Sept. 1972, p. 41.

The engineer in today's world. C. F. Jones. Jan. 1972, p. 13.

Women and the engineering profession. M. A. H. Franson. Dec. 1972, p. 32.

EXTRACTIVE METALLURGY

A proposed route for the co-extraction of uranium and thorium for sulfuric acid and recovery by selective stripping and denitration. G. M. Ritcey and B. H. Lucas. April 1972, p. 39.

Aluminum as a reductant. D. Belitskus. Jan. 1972, p. 30.

Recovery of copper from slags by flotation. K. N. Subramanian and N. J. Themelis. April 1972, p. 33.

HEAT TREATING

Trigas fluxing. R. J. Adamo and C. L. Brooks. Aug. 1972, p. 21.

HISTORY

A century of development in metallurgical physical chemistry. R. A. Swalin. Jan. 1972, p. 35.

100 years of progress in process metallurgy. J. F. Elliott. March 1972, p. 51.

Tomorrow's metallurgy. J. J. Gilman. Feb. 1972, p. 51.

INLAND STEEL

Inland's new melt shop on display. Nov. 1972, p. 32.

INSPIRATION

Air pollution abatement plans at the Inspiration smelter. D. W. Rodolff and E. R. Marble, Jr. July 1972, p. 14.

IRONMAKING

Cokemaking in the Seventies. Feb. 1972, p. 32.

Computer program for study of blast furnace burdens and practices. T. M. Barnes and H. W. Lownie, Jr. Feb. 1972, p. 46.

Computer techniques for blast furnace burdening control. June 1972, p. 33.

High grade reducing gas for metallurgical applications. J. A. Finneran, J. C. Yarze, M. I. Greene, and H. Watson. Feb. 1972, p. 35.

Ironmakers to see America's biggest blast furnace. Feb. 1972, p. 19.

Some new results of flooding in packed beds and their significance to blast furnace hanging. N. Standish and J. B. Drinkwater. Feb. 1972, p. 43.

Titanium sub-oxides and the blast furnace slag's fluidity. G. Handfield, G. G. Charette, and H. Y. Lee. Sept. 1972, p. 37.

LUKENS STEEL

Slab casting is here to stay. Aug. 1972, p. 18.

MATERIALS

Advanced composites design: B & W takes a big step. April 1972, p. 23.

Aluminum matrix composites. I. J. Toth, W. D. Brentnall, and G. D. Menke. **I Introduction and primary fabrication methods.** Sept. 1972, p. 19. **II Secondary fabrication.** Oct. 1972, p. 37. **III Mechanical properties.** Nov. 1972, p. 72. **IV Environment, application, cost, and future.** Dec. 1972, p. 37.

Potential for production of metallic and ceramic materials by freeze-drying. S. H. Gelles and F. K. Roehrig. June 1972, p. 23.

MATERIALS SCIENCE

1972 senior class—metallurgy and materials science. J. P. Nielsen. April 1972, p. 45.

Educational trends in metallurgy and MSE. M. Cohen. Jan. 1972, p. 42.

MECHANICAL WORKING

Low-cost sheet, an R & D problem. F. M. Palmer. Dec. 1972, p. 29.

Microduplex processing of low alloy steels. E. Snape and N. L. Church. Jan. 1972, p. 23.

Practical implications of thermal-mechanical processing. R. M. Jamieson. Dec. 1972, p. 25.

Thermomechanical processing of nickel-base alloys. B. H. Kear, J. M. Oblak, and W. A. Owczarski. June 1972, p. 25.

METALLIC SODIUM

Tekkosha's new metallic sodium process. T. Nakamura and Y. Fukuchi. Aug. 1972, p. 25.

METALLURGY

1972 senior class—metallurgy and materials science. J. P. Nielsen. April 1972, p. 45.

Educational trends in metallurgy and MSE. M. Cohen. Jan. 1972, p. 42.

100 years of progress in process metallurgy. J. F. Elliott. March 1972, p. 51.

Paced instruction in metallurgical engineering. F. E. Rizzo and J. H. Ford. July 1972, p. 35.

Tomorrow's metallurgy. J. J. Gilman. Feb. 1972, p. 51.

NIPPON KOKAN

Slab casting is here to stay. Aug. 1972, p. 18.

NORANDA PROCESS

The Noranda process for continuous smelting and converting of copper concentrates. N. J. Themelis, G. C. McKerrow, P. Tarassoff, and G. D. Hallett. April 1972, p. 25.

PHYSICAL METALLURGY

A century of development in metallurgical physical chemistry. R. A. Swalin. Jan. 1972, p. 35.

PLATE MILLS

Practical implications of thermal-mechanical processing. R. M. Jamieson. Dec. 1972, p. 25.

POLLUTION ABATEMENT

Air pollution abatement plans at the Inspiration smelter. D. W. Rodolff and E. R. Marble, Jr. July 1972, p. 14.

Decision analysis for emission control process selection. J. C. Daley and E. C. Johnson. July 1972, p. 30.

Engineers and the environment. H. H. Kellogg. June 1972, p. 13.

Environment first: then profit. Jan. 1972, p. 16.

Sulfur recovery from metallurgical fluegas. G. M. Meisel. May 1972, p. 31.

PRESSURE CASTING

Griffin Wheel. Nov. 1972, p. 50.

REDUCING GASES

High grade reducing gas for metallurgical applications. J. A. Finneran, J. C. Yarze, M. I. Greene, and H. Watson. Feb. 1972, p. 35.

REFRACTORIES

Effect of operating variables on BOF lining. R. K. Lyengar and F. C. Petrilli. Mar. 1972, p. 46.

Review of roof refractories in the reverberatory copper smelting furnace. A. L. Renkey and T. F. Soroka. June 1972, p. 18.

ROTARY FURNACE

Tin smelting in rotary furnaces. T. R. A. Davey and F. J. Flossbach. May 1972, p. 26.

SCRAP PREHEATING

Oxy-fuel oil practice and performance for BOF steelmaking. J. W. Onuscheck and R. L. W. Holmes. Sept. 1972, p. 26.

SCRAP RECLAMATION

Engineers and the environment. H. H. Kellogg. June 1972, p. 13.

Trends in recycling not encouraging. R. E. Train, S. Hale, Dr. J. Boyd, and F. Berman. Nov. 1972, p. 54.

SLAGS

Recovery of copper from slags by flotation. K. N. Subramanian and N. J. Themelis. April 1972, p. 33.

Titanium sub-oxides and the blast furnace slag's fluidity. G. Handfield, G. G. Charette and H. Y. Lee. Sept. 1972, p. 37.

STEEL COMPANY OF CANADA

Design aspects of Stelco's BOF facility. G. F. Newton. Oct. 1972, p. 15.

STEEL IMPORTS

U. S. as part of the world steel market. Sept. 1972, p. 17.

STEELMAKING

A new lease for the Bessemer. R. Deily. Mar. 1972, p. 31.

Design aspects of Stelco's BOF facility. G. F. Newton. Oct. 1972, p. 15.

Griffin Wheel. Nov. 1972, p. 50.

Optimum economics via arc furnace power demand control. D. R. Jones and W. F. Monteith. Nov. 1972, p. 60.

Oxy-fuel oil practice and performance for BOF steelmaking. J. W. Onuscheck and R. L. W. Holmes. Sept. 1972, p. 26.

Technical economics for metallurgists. R. J. Kuhl. **I Factors and methods in feasibility.** May 1972, p. 40. **II Selecting processes and equipment.** June 1972, p. 40. **III Construction and production in estimating.** July 1972, p. 39. **IV Financial analysis of a project.** Aug. 1972, p. 28. **V A case study: maxi or mini.** Sept. 1972, p. 41.

The start-up and design of the BOP shop at U. S. Steel Lorain Works. T. V. Ciukaj. Mar. 1972, p. 43.

Vacuum induction melting technology of high-temperature alloys. R. Schlatter. May 1972, p. 17.

SULFUR RECOVERY

Sulfur recovery from metallurgical fluegas. G. M. Meisel. May 1972, p. 31.

TEKKOSHA

Tekkosha's new metallic sodium process. T. Nakamura and Y. Fukuchi. Aug. 1972, p. 25.

TEMPERATURE CONTROL

Temperature control for a six-strand billet caster. D. A. Domchek. Mar. 1972, p. 38.

THORIUM

A proposed route for the co-extraction of uranium and thorium for sulfuric acid and recovery by selective stripping and denitration. G. M. Ritcey and B. H. Lucas. April 1972, p. 39.

TIN

Tin smelting in rotary furnaces. T. R. A. Davey and F. J. Flossbach. May 1972, p. 26.

TITANIUM

A look at the near future of titanium. E. R. Rowley. Oct. 1972, p. 12.

Aluminum as a reductant. D. Belitskus. Jan. 1972, p. 30.

Titanium sub-oxides and the blast furnace slag's fluidity. G. Handfield, G. G. Charette and H. Y. Lee. Sept. 1972, p. 37.

URANIUM

A proposed route for the co-extraction of uranium and thorium for sulfuric acid and recovery by selective stripping and denitration. G. M. Ritcey and B. H. Lucas. April 1972, p. 39.

UNITED STATES STEEL LORAIN WORKS

The start-up and design of the BOP shop at U. S. Steel, Lorain Works. T. V. Ciukaj. Mar. 1972, p. 43.

UNITED STATES STEEL SOUTH WORKS

Steelmakers to tour South Works steelmaking facilities. Mar. 1972, p. 21.

VACUUM INDUCTION MELTING

Vacuum induction melting technology of high-temperature alloys. R. Schlatter. May 1972, p. 17.

MECHANICAL WORKING AND STEEL PROCESSING X

Proceedings of the 14th Mechanical Working and Steel Processing Conference, Chicago, Illinois, January 19, 1972.

Sponsored by the Mechanical Working and Steel Processing Committee, Iron and Steel Division, The Metallurgical Society of AIME.

Edited by F. E. Richardson, L. Mair, J. D. Grozier, and A. J. Scheel

Contents include:

Flat Rolled Products: The Influence of In-Line Temper Rolling and Stretch Leveling on the Properties of Galvanized Steel Strip (Pierson and Strait); Effect of Thermal History on Properties of Hot-Rolled, Low-Carbon, Aluminum-Killed Steel Sheet (Simpkinson et al.); Nitrogen Pick-up from DX Atmospheres During Box-Annealing of Aluminum-Killed Steel (Panuska et al.); Effects of Structural Variables on the Magnetic Properties of Cold-Rolled Carbon Steels (Charpentier and Bucher); Control of Transverse Properties in High-Strength, Low-Alloy Steels (Ballance and Mintus); The Development of a High-Strength, Hot-Rolled, Mn-Mo-Cb Steel (Cryderman et al.); Effect of Processing Variables on Properties of a Low-Carbon, Columbium Steel Proposed for Arctic Pipelines (Gray and Wilson); IN-787: An Age Hardenable Steel for Line Pipe and General Structural Uses (Hydrean et al.).

Bar and Semi-Finished Products: Role of Second Phase Particles in Forming Operations (Held and Paliwoda); Factors Governing Cold Headability of Carbon Steel Rods (Paliwoda and Brown); Panel on Extrudable Steels (Hayes, Gezella, Levy); Effect of Microstructure on Tensile Strength and Upset Compression Characteristics of AISI 1038 Spheroidized Steel (Lorenzetti and Moroz); Machinability of AISI 4140 Type Steels Maximized by Selenium (Tata and Sampsell); The Questionable Seam-Ferrite Fingers (Buchan); A Single Leaf Spring—An Exercise in Effective Use of Steel (Poulos and Brennan).

Tubular Products: Fifty-six Inch OD Welded Pipe Metal (Takahashi); Study of Mannesmann First Piercer Variables and Their Impact on Pipe Surface Quality (Ruff).

450 pages—Now Available

Members—$12.00
Non-Members—$16.00

Please add $1.00 per book for mailing and handling. Prepayment expedites your order. Please make checks payable to AIME. Send your order to AIME Book Order Dept., 345 East 47th Street, New York, N.Y. 10017.
